DOCTOR OF PHILOSOPHY WITH A MAJOR IN BIOLOGY

Each PhD student will acquire a thorough knowledge of a selected area of specialization, a broad knowledge of the field, and competence in the basic sciences. The main emphasis is on the successful completion of an original and independent research project. The purpose of our PhD program is to prepare highly qualified scientists who have excellent, up-to-date training in the fields of biology or bioinformatics, who are actively involved in scientific research, are capable of making significant contributions to their scientific field, possess all the necessary skills for effective oral and written communication with colleagues, and can successfully compete in the job market for postdoctoral and research scientist level positions in academia, science-related industries, and a wide range of other careers.
